## SKILLS

Javascript    Typescript    React    Redux    Angular

Vue.js    Node.js    SpringBoot    React Native

Sql/NoSql    Git    GraphQL    aws S3

## PERSONAL AND ACADEMIC PROJECTS

### Blitz learning assistant (02/2021 - 05/2021)

- A platform that allows users to progress with their learning and skills with the help of a chatbot made with Dialogflow and many other features.
- Used Reactjs as a front end main library with mostly functional components, hooks and redux for the state organizing.
- Development of the back end was made with nodejs and express with many external APIs such as Udemy affiliate and github jobs.
- Feel free to check the application: 'https://blitz-assistant.herokuapp.com/'

### Recipe Catalog (10/2020 - 11/2020)

- An Angular application that is used to find recipes from all around the world. The project focuses on the key features and skills required to successfully implement a modern angular application.
- Fully functional CRUD operations with http access using RxJs observables, Spoonacular API for recipes and Firebase for login and data storage.

### Metropole hotel management system (08/2020 - 09/2020)

- An hotel management system to facilitate the clients and workers supervision with a crud, reservation and account management features.
- The front end of this project was made with Angular 8, multiple simple interfaces were implemented to help the employees do their job as easily as possible.
- Used Spring boot for the back end server along with spring security and mysql database.
